Script	Citation	Area Used In (How + Where)
AudioManager	Unity Sound System for Beginners	Used to play sounds, uses a Singleton pattern to have a static AudioManager object which can be used to play sounds from any other script.

LevelLoader (Original)	▶ How to make AWESOME Scene Transitions in Unity!	Used to create a crossfade (fade to black) for transitions between the scenes. Uses a coroutine to play an animation on a canvas, changing the opacity of a panel.
XR Socket Interactors	▶ Unity VR XR Interaction Toolkit - XR Socket Interactor	Used for platforming objects to be snapped into place. For example, the ruler in the office scene needs to be placed to act as a ramp, and to ensure it is secure, we snap it into a specific position.
3D Audio Spatialization	▶ 3D Audio Spatialization Audio in Unity Episode5	Used to add audio to objects which have spatialization, or fall off as you move closer/further to the source of the sound.
Door Animation	▶ Playing Animation on Trigger in Unity	Used to learn how to set triggers to activate animations.
Load Zones	🔗 Unity - Scripting API: WaitForEndOfFrame	Used as a delay for changing between warehouse and security scenes. Ensures that the textures have loaded for the next area before letting the player in.

Spawning Objects	🔗 Unity - Manual: Introduction to instantiating prefabs	Used to instantiate an object when the player is hit by an enemy. (goo droplets)
Chewing Particles	🔗 Unity - Scripting API: ParticleSystem	Used to simulate 'chewing' with a particle system
LevelLoader (updated)	📺 Smooth Scene Fade Transition in VR	This updated level loader now works with the VR headset, using a quad in front of the camera. Modified the tutorial to fit with our existing scripts and singleton patterns
